

Testing

This is a test-file for exporting org to latex with formatted code

```
class Foo
{
    public:
        Foo() {}
        virtual Bar run() = 0;
        virtual ~Foo() {}
        int pop_size; // Comments
        unsigned int max_num_evaluations;
}

int main()
{
    std::cout << "Is this broken ?\n";
}
```
